## SUMMARY

Product leader, 13+ years fintech/DeFi/AI. Head of Product at Finin — neobank acquired by Open Financial Technologies (employee #2). Founded Hashstack, a DeFi lending protocol: \$1M seed + additional private funding, 36K on-chain users, 16 engineers. Designed an AI consumer product from domain expertise.

## EXPERIENCE

### Hashstack Finance

2020 – 2026

*Founder & CEO — [hashstack.finance](#)*

*Bengaluru*

- Raised \$1M seed + additional private funding; acquired 36,000 on-chain users at \$55 per user. Generated \$56K+ revenue in first year of operations
- Designed [Degen Mode](#) — one-click leveraged strategy execution that abstracted complex financial operations (borrowing, swapping, liquidity provisioning) into automated strategies while constraining capital to approved deployment channels for solvency
- Designed the [Dynamic Interest Algorithm \(DIAL, v1\)](#) for term-deposit lending (utilization + commitment tranches). Evolved to an [Interest Rate Model \(v2\)](#) — kinked utilization curve — for auditability and determinism
- Led product across engineering, community, and BD with a 16-person team. Deprioritized exchange listing to focus on platform security — culminating in a [CertiK security audit](#)
- Orchestrated 7 financial infrastructure integrations for pricing, liquidity, and risk data. Secured 180,000 STRK and \$50K (Harmony) in ecosystem grants across 4 rounds. Authored [EIP-5299](#)
- Published 2 technical whitepapers on protocol architecture
- Led structured wind-down — infrastructure adoption stalled and migration cost exceeded expected ROI. Deployed on a second chain (Base) to validate platform portability

### Finin

Oct 2019 – Jul 2020

*Head of Product — acquired by Open Financial Technologies*

*Bengaluru*

- Digital-first neobank — savings accounts, cards, and personal finance tools for young Indians
- Employee #2. Built engineering team from 0 to 16
- Shipped core banking product end-to-end — KYC onboarding, savings accounts, card issuance, transaction history
- Integrated State Bank of Mauritius as core banking partner; managed banking API integration and compliance
- Built unified transactional intelligence using account aggregators, surfaced through an in-app conversational chatbot
- Acquired 5,000 savings accounts through product-led growth. Navigated RBI regulatory requirements for digital banking
- Company acquired by Open Financial Technologies — validated product-market fit

### Parashar

2024 – Present

*Product & AI (Side Project)*

- AI consumer product applying predictive analysis to a traditional knowledge domain
- Defined product vision, scoped problem space, and designed end-to-end UX; translated domain rules into AI training requirements and evaluation criteria

### Guardrail

2016 – Present

*Managing Partner — [guardrail.fund](#)*

- Conviction-driven single-family office deploying principal capital across digital assets, precious metals, real estate, and frontier tech. 10+ year horizon
- Sourced and evaluated deal flow; developed market theses for early-stage digital assets (2017–2019). Angel investor in Gushwork (\$9M seed)

## Earlier Experience

*Echo · Qulp · AIESEC*

- **Echo** (Co-founder, 2016–2017) — Location-based social discovery. Facebook FBSTART. SURGE 2016. 3,000 users. #13 India Play Store, zero marketing spend
- **Qulp** (Founder, 2013–2015) — Hardware innovation platform. Google Launchpad 2014. TiE Asia regional finalists 2014. \$60K in pre-orders. Team of 7
- **AIESEC IIT Kharagpur** (VP Marketing & PR, 2010–2013) — Led 13-person team across promotions, branding, and media. 1st place, Nokia–AIESEC India campaign
